

QASIM MUSTAFA ZUBERI

+92-333-8971343 qasimmustafa112@gmail.com linkedin.com/in/zuberiii Rawalpindi, Pakistan

PROFESSIONAL SUMMARY

2x Founder and Computer Science graduate specializing in cybersecurity, AI/ML, intelligent automation, and secure systems engineering. Experienced in architecting edge AI systems, IoT ecosystems, intrusion detection platforms, LLM-powered pipelines, and backend APIs using Python, Django, Docker, and CI/CD tooling. Strong foundation in networking protocols (TCP/IP, UDP, CIDR), cyber defense, NLP, computer vision, and cloud-native deployment. Passionate about bridging abstract neural networks with rugged hardware deployments and building high-impact solutions to difficult engineering problems.

EDUCATION

KICSIT, Sub Campus IST Islamabad, Pakistan
Bachelor of Science in Computer Science 2021 – 2025

- Relevant Coursework: Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Computer Networks, Software Engineering, Database Systems, Operating Systems, Cybersecurity

PROFESSIONAL EXPERIENCE

Shadow Hawk Pakistan
Founder / CEO 2026 – Present

- Founded Shadow Hawk, a System-as-a-Service (SYSaaS) and Software-as-a-Service (SaaS) cybersecurity venture delivering CTI-based defense platforms, secure IoT ecosystems, and AI-driven threat detection as subscription services
- Architected multi-tenant SaaS backend infrastructure using Django, PostgreSQL, Docker, and CI/CD pipelines to serve enterprise and SMB security clients at scale
- Designed and deployed edge AI security systems combining deep-packet network vulnerability assessment, CIDR-based filtering, and automated threat response as managed service offerings
- Led end-to-end product development across cybersecurity, embedded systems, and AI product lines, delivering 50+ projects to clients across multiple sectors
- Owned full technical direction including system architecture, team leadership, client delivery, and infrastructure across SaaS and SYSaaS product verticals

NASTP Alpha Rawalpindi, Pakistan
Automation Specialist Sep 2025 – Present

- Developed Python-based automation workflows and intelligent monitoring systems for operational environments
- Implemented log analysis, system monitoring, and workflow orchestration pipelines using scripted automation
- Assisted in designing AI-driven automation pipelines for operational process optimization
- Collaborated with cross-functional engineering teams to build scalable monitoring and alerting frameworks

Devrolin Pakistan
Automation Engineer Sep 2025 – Feb 2026

- Built Python automation tools for log processing, data pipeline orchestration, and workflow optimization
- Integrated automation scripts into software development workflows to streamline repetitive engineering tasks
- Developed monitoring utilities that reduced manual overhead for operational engineering teams
- Collaborated with developers to implement CI/CD-ready automation across multiple environments

PROJECTS

CTI-Based Intrusion Detection & Prevention System | Python, Suricata, Snort, IoT, TCP/IP

- Designed and built a Cyber Threat Intelligence-based IDS/IPS to analyze network traffic and detect malicious activity in real time
- Implemented automated threat detection using packet-level network monitoring, CIDR-based IP filtering, and rule-based signatures
- Integrated IoT sensors and devices to collect network telemetry and feed into the detection engine
- Developed automated response mechanisms to block suspicious TCP/UDP traffic patterns based on CTI feeds

HuMotion Prosthetic Arm System | *Embedded Systems, Microcontrollers, Sensors, Robotics*

- Designed a prosthetic arm prototype controlled through EMG muscle signal detection sensors
- Implemented microcontroller-driven robotic actuation and sensor-based motion control algorithms
- Built hardware prototype integrating embedded control logic with real-time sensory feedback

SheSafe Women Safety System | *Android, Firebase, GPS, IoT Monitoring*

- Developed a safety application with real-time GPS tracking and automated emergency notification via SMS/call
- Integrated health monitoring and Firebase-based alerting for rapid emergency communication

Smart Home Surveillance System | *Python, OpenCV, Computer Vision, RTSP Streaming*

- Developed an AI-based surveillance system to monitor home environments using live camera feeds
- Implemented computer vision pipelines to detect motion, identify suspicious activity, and trigger alerts

Bullying Detection System | *ML, NLP, Computer Vision, TensorFlow, YOLO*

- Built a real-time bullying detection system using multi-modal ML models on image, video, and text streams
- Integrated NLP classifiers for text-based abuse detection alongside computer vision models for behavioral analysis
- Processed multi-camera feeds for automated monitoring and harmful behavior classification

Calling Agent Automation | *Python, REST APIs, Workflow Automation*

- Built Python automation tools to manage and optimize call agent workflows, reducing manual effort significantly
- Integrated REST API hooks and scripting to automate task routing and operational reporting

TECHNICAL SKILLS

Programming Languages: Python, C++, Java, SQL, Bash/Shell Scripting, JavaScript

AI / Machine Learning / LLMs: TensorFlow, Scikit-learn, NumPy, Pandas, OpenCV, YOLO, Large Language Models (LLMs), Prompt Engineering, LangChain, Hugging Face Transformers, RAG Pipelines, Fine-tuning, Ollama

Natural Language Processing (NLP): Text Classification, Named Entity Recognition (NER), Sentiment Analysis, Tokenization, spaCy, NLTK, Transformers (BERT, GPT), Text Embeddings, Vector Databases (FAISS, Chroma)

Backend Development: Django, Django REST Framework (DRF), REST API Design, FastAPI, Flask, JWT Authentication, OAuth2, WebSockets, Celery (Task Queues), Redis

Databases: PostgreSQL, MySQL, SQLite, MongoDB, Redis, Firebase Firestore, Database Design & Normalization, ORM (Django ORM, SQLAlchemy)

DevOps / CI-CD: Docker, Docker Compose, Jenkins, GitHub Actions, GitLab CI, CI/CD Pipelines, Infrastructure as Code basics, Linux Server Administration, Shell Scripting, Nginx, Gunicorn

Networking & Cybersecurity: TCP/IP, UDP, ICMP, HTTP/HTTPS, DNS, DHCP, CIDR / Subnetting, VLANs, Routing & Switching, Cisco Networking, Wireshark, Nmap, Intrusion Detection Systems (IDS/IPS), Snort, Suricata, Cyber Threat Intelligence (CTI), OWASP Top 10, Firewall Configuration, VPN, Network Packet Analysis, Port Scanning, Vulnerability Assessment

Automation & Systems Engineering: Python Automation, Workflow Orchestration, Log Analysis & Parsing, System Monitoring, Data Processing Pipelines, Task Scheduling (Cron, Celery)

Web Development: HTML5, CSS3, JavaScript, REST API Integration, Responsive Design, Jinja2 Templating, Bootstrap

Mobile Development: Android Studio (Java/Kotlin basics), Firebase (Auth, Realtime DB, Firestore, Cloud Messaging)

Tools & Platforms: Git, GitHub, Linux (Ubuntu/Debian), VS Code, Postman, Docker Hub, Canva, Adobe Photoshop, Microsoft Office

CERTIFICATIONS

Python for Data Science

IBM / Coursera

Introduction to IoT

Cisco Networking Academy

Machine Learning Basics

Google AI
